~~SECRET~~

TWELFTH ARMY GROUP
SCI DET., MUNICH

18 June 1945

SUBJECT: Activity Report for Week Ending 16 June 1945

MOUNT CASE:

Operations on this case continued under the supervision of SCI. Successful radio contact was maintained with both Budapest and Bucharest. Inasmuch as the decision was made to operate the case purely as a CE enterprise it is being conducted with a view to termination at an early date as soon as the names, identity, location and operations of all W/T agents are determined. Through careful interrogation of the cooperating German agents it is believed that most of this information has already been obtained, and it is now being verified. There is some indication that the W/T agents communicating with our control Central may be under control and the case is being handled with this possibility in mind. It was decided that for the time being Dr. HOETL should remain in custody at the Third Army IC and the agents who are working the set under SCI direction and control have been told that he is still unable to travel. It should be noted that the agents are becoming restless because we have not allowed any traffic for positive information. In view of this fact a decision was reached to tell them that the reason for this inactivity and the sending of only service and test messages was because of the suspicion that the agents were under control. It is believed that this subterfuge will stall the operations for another week during which time the remainder of the necessary information can be obtained.
